Profile

Currently pursuing my Bachelor of Science in Computer Science at FAST-NUCES. I have a strong passion for technology, with a focus on AI and web development. I enjoy creating user-friendly digital experiences, building innovative web solutions, and exploring the potential of intelligent systems. Always curious and eager to learn. I'm committed to combining creativity with technical skills to solve real-world problems.

Experience

Frontend Developer - Apexcify Technologys

March 2026 – April 2026

Internship

- Build and maintain responsive web pages using HTML, CSS, and JavaScript.
- Develop interactive web features and ensure smooth user experience.

Marketing Specialist - Aga Khan Development Network

May 2026 – Present

Contract

- Working as a TKN volunteer with AKS EdTech Initiative to build a sustainable, scalable education model where teachers are supported to use modern digital tools, students see themselves reflected in relevant, future-ready curriculum, and youth move from content consumers to solution creators.

Front-end AI Engineer - FlyRank AI

July 2026 – Aug 2026

Internship

- Currently interning at FlyRank AI as an AI intern, focusing on Front-end AI Engineering.

Education

National University of Computer and Emerging Sciences (FAST)

2024 – Present

Bachelor's in Computer Science

Aga Khan Higher Secondary School

2022 – 2024

Intermediate, Science General

Sultan Mohammad Shah School

2020 – 2022

Matriculation, Science

Projects

• Exlr AI: AI-Powered Learning Platform

- Exlr AI is a full-stack learning platform built to help AKUEB SSC and HSSC students prepare for their exams.
- It combines a 13-year past papers archive with a suite of AI-powered study tools, so students get everything from notes to a full mock exam in one place.
- Built with React 19 and styled with a dark, editorial-inspired theme using Space Grotesk typography. Every page — from the landing site to the exam simulator — follows a consistent design language with subtle glow accents and a focus on readability for long study sessions.

- Tech Stack: React19, TypeScript, Next.js 16, Tailwind CSS, Next.js API Routes (Deployed), Supabase (PostgreSQL + Auth + Storage), Groq API (Llama 3.3 70B)

- **AI-Powered Trip Planner Agent**

- An intelligent travel planning application that automatically generates optimized and personalized day-by-day itineraries based on user preferences including destination, budget, duration, and interests.
- Designed and developed a goal-based AI agent that explores all possible itinerary combinations, applies budget and duration constraints, and selects the most relevant travel plan tailored to the user.
- Integrated OpenAI API with carefully engineered prompts to convert structured itineraries into human-friendly, readable travel guides delivered through a clean and responsive web interface.
- Tech Stack: Python, Flask, HTML, CSS, JavaScript, OpenAI API

- **Graph-Based Path Finder**

- A directed weighted graph visualizer built using data structures and algorithms - BFS, DFS, Dijkstra, Cycle Detection, Connectivity Check.
- Graph Operations - Add / remove nodes and edges (with weights), Directed edges with visual arrowheads, Drag-and-drop node repositioning.

- **Product Listing Website**

- A modern and responsive product listing website built using HTML, CSS, and JavaScript.
- It features a clean UI with dynamic product rendering, filtering, search functionality, and an interactive shopping cart.

- **Apexcify Technologys Company Website**

- A fully responsive and modern company website developed as part of my internship project.
- Built using HTML, CSS, and JavaScript, featuring a clean and interactive UI with smooth animations and an engaging user experience.
- It features a clean glassmorphism UI with home, about, services, projects, and contact form section.

Skills Summary

Low Level and Systems: C/C++, OOP, x86 Assembly

Web Development: HTML, Tailwind CSS, JavaScript, React, Next.js, TypeScript, Flask, Groq API

AI/ML and Data Science: Python, PyCharm, Pandas, NumPy, Matplotlib, Sea-born, Scikit-learn

Database: MySQL, PostgreSQL, Supabase

DevOps and Tools: Git/GitHub, VS Code, Jupyter, Vercel

Soft Skills: Problem-Solving, Creativity, Communication, Collaboration

Certifications

- **Speed Programming – ACM NUCES**

- **Skills:** C, Problem Solving, Time Management

- **Competitive Programming – ACM NUCES**

- **Skills:** Data Structures, C++, Problem Solving, Time Management

- **Graphic Designing – LMS Digi Skills**

- **Skills:** Typography, Color theory, Layout, Branding, Visual Identity Creation

Volunteering

- **Social Service Worker** – Ismaili Volunteers
 - I have actively participated in developing community projects and organizing camping initiatives, while working toward annual goals centered on social responsibility.
 - These include environmental sustainability, humanitarian support, and awareness campaigns.
 - Through these efforts, I strive to make a meaningful difference and encourage global collaboration on key social and ecological challenges.
- **Guest Relations** - Developer's Day - ACM NUCES
 - Served as a team guest relations, welcoming and assisting guests and speakers to ensure a smooth and professional event experience.
